Cells: ANCOM-BC2 LFC vs Control; * Dunnett-adjusted q < 0.05 (none reached this threshold).
Global q: omnibus test across antibiotics (bold = q < 0.05; § = failed pseudo-count sensitivity analysis).
Taxa absent from any group (structural zeros) are excluded from testing.

q < 0.05
n.s.
No taxon reached q < 0.05 in either contrast; all 19 taxa passing the prevalence filter are shown (ANCOM-BC2).
No point = taxon not tested in that contrast (prevalence filter / structural zero).
